

Kay Cheung

FULLSTACK DEVELOPER

ky.cheung529@gmail.com | +852 6683 0059

GitHub: github.com/kayc529 | Portfolio: kay-cheung.com

TECHNICAL SKILLS

- Languages: Java, SQL, JavaScript, TypeScript, Python
- Backend: Spring Boot, Hibernate/JPA, REST APIs, OAuth2/OIDC, Keycloak, Stripe API
- Frontend: React, Next.js, React Native, HTML, CSS, TailwindCSS
- Database: PostgreSQL, MySQL, Redis, MongoDB, Flyway
- Cloud & DevOps: AWS (ECS, RDS, Lambda, S3, SNS/SQS, CloudFront, EC2, ALB, EventBridge), Docker, Terraform, GitHub Actions, Firebase

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Self-employed

Jan 2024 - Present

- Migrated client websites from WordPress to full-stack applications using Spring Boot, PostgreSQL, and React, deployed on AWS
- Customized an enterprise ERP system for a Canadian auto parts company by scraping product data with Python, designing database schemas, and improving internal workflows for sales and warehouse operations
- Built and deployed a website for a Canadian NGO using Next.js and Firebase, including a custom CMS, analytics integration, and backend services for content and media management
- Developed a data visualization tool for a local councillor's office to convert internal data into charts for publication on a community website

Software Developer | Accenture

Apr 2020 - Apr 2021

- Architected and developed a cross-platform cargo tracking application for the Hong Kong Airport Authority (HKAA) using React Native and TypeScript
- Integrated Firebase Cloud Messaging, biometric login, and real-time notifications to support operational tracking workflows
- Built a reusable component library for mobile development, adopted internally to standardize UI patterns and accelerate delivery
- Led mobile development and collaborated with a cross-functional team to deliver the application

Software Developer | Antelope Intl. Ltd.

Aug 2019 - Mar 2020

- Developed and enhanced features for a Document Management System using Java and Android Studio for tablet and smartphone clients
- Designed and implemented an offline-first data synchronization layer using SQLite, enabling reliable local caching and server sync in low-connectivity environments
- Built a custom Android application for Canon printers, integrating a third-party payment gateway API to enable direct in-printer payment processing for print services
- Resolved 70%+ of known bugs, significantly increasing system stability and improving end-user satisfaction

Frontend Developer | Skytree Digital Ltd.

Dec 2018 - Jun 2019

- Developed, maintained, and shipped production code for an award-winning mobile game on iOS and Android using C# and Unity3D
- Implemented an efficient file zipping system that resulted in a 40% reduction in game assets download time, significantly enhancing the game's accessibility and user satisfaction
- Built a web-based top-up platform using HTML, CSS, and JavaScript, integrating with MyCard API to enable seamless in-game currency purchases

PROJECTS

Tender Chops | Microservices E-Commerce Platform

- Designed and built a distributed e-commerce backend with independently deployable Spring Boot microservices, using REST APIs and asynchronous SNS/SQS messaging
- Implemented secure authentication with Keycloak (OAuth2/OIDC) and deployed services on AWS ECS Fargate with PostgreSQL (RDS), Redis, and ALB routing
- Built Stripe payment flows with idempotent processing, transactional consistency, and webhook-driven state transitions
- Implemented an S3/CloudFront media pipeline with Lambda-based image processing for product image upload and delivery
- Containerized services with Docker, managed database migrations with Flyway, and used EventBridge Scheduler for cost-optimized infrastructure management

CERTIFICATES

AWS Certified Solutions Architect – Associate	Jul 2025
--	-----------------

EDUCATION

Centennial College, Toronto ON	2021 - 2023
Diploma in Software Engineering	
City University of Hong Kong, Hong Kong	2011 - 2015
BSc(Hons) in Creative Media
